UV Ink Spitting

Fluid transfer to the plate or blanket with no spitting

Pressroom Safety

No injuries to operators when changing blades

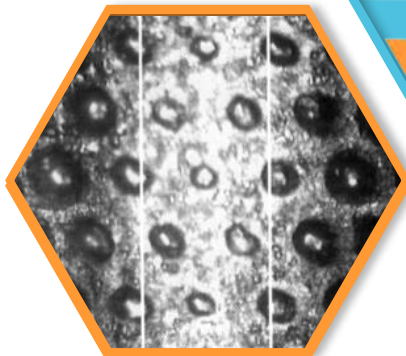

Advanced Metering

Exceptional metering in the most demanding applications

Anilox Roll Scoring

No splintering of the material that can cause scoring

Blade Life

Durable blade material lasts longer than steel

Special Formulas

Compatible with opaque white and specialty coating formulas

MICROTIP®

A full range of size and profile combinations for customized solutions

TRUPOINT POLYESTER™

Containment blade is highly resistant to chemicals, offers superior blade life and reduces anilox scoring in chambered blade systems
